GREENHOUSE GAS GHG EMISSIONS AND GENERATION VOLUME DISCLOSURE UPDATE FOR 2017 AND 2018

This document provides the following:

- 2017 GHG emissions an d generation MWh data re ecting full year impact of Dynegy's assets and Vistra's legacy assets
- 2018 GHG emissions an d generation MWh data re ecting full year impact of Dynegy's assets and Vistra's legacy assets

Vistra is providing this disclosure for the following reasons:

2017 data provided to inform external stakeholders of our historical CO2e emissions.

- Re ects Dynegy assets a cquired in April 2018 along with Vistra's legacy assets to allow a "like for like" comparison.

2018 data provided to re ect full year generation volumes and minor adjustment to 2018 GHG emissions.

- Pre vious sustainability reporting for generation volumes provided a "partial year" view (April to December) aligned with our 2018 10K. Revised volumes for 2018 re ect an "all year" view. GHG emissions were previously reported on a "all year" view. Note GHG emissions below re ect slight equity adjustments made to Scope 1 (<5,000 mt CO_2e) and inclusion of relevant Scope 3 category.

Metric	2017	2018
